

I pay hard green cash for what I want. It is very unlikely that the AM nor FM radio stations will provide what I want to hear and when I want to hear it. These stations provide a generic service for free. I have no use for generic services! This is a free market economy and it is up to the market to decide what will and will not work.

I am demanding that the FCC reject the NAB's petition for 04-160. Once again stay out of making rules that inhibit competition! I like my XM as it caters to what I want.

Thanks
